

CASE STUDY | MEDIA COMPANY UNITED KINGDOM

PROJECT: Media Company UK
CATEGORY: Corporate
DURATION: 3 years
SIZE: 4500 people

Working with one of the largest Media companies in the world, our brief was to consolidate multiple global companies from different geographic locations from within the group, into one single building.

The building, designed by Renzo Piano, part of the London Bridge Quarter and financed by the State of Qatar, benefits from sharing architectural, design and cultural DNA with the Shard, and forms part of London's most exciting regeneration projects.

The challenge of combining different cultures into one building was managed by our dedicated team who were placed on site full time for 3 years, managing the relocation of over 4500 people.

The responsibility of our team ranged from managing churn, sourcing, procurement, installation and interior consulting.
